 Current Price per Share: \$10.40
 Reinvestment Price per Share: \$9.88
 Cumulative Capital Raised during Offering (including DRP):..... \$2,737.0 Million

Performance Profiles

Operating Performance

The REIT's recent 12-month average return on assets exceeds yields on 10-year Treasuries, indicating potential for positive risk-adjusted returns. At its current cost of debt and level of borrowing, its use of debt is contributing to increased returns for shareholders.

Financing Outlook

Interest coverage ratio is above the 2.0X benchmark but more than 20% of the REIT's debt matures within two years or is at unhedged variable rates. The REIT may face difficulties in refinancing its borrowings or interest rate risk from increasing rates, but earnings currently provide coverage of interest expense.

Cumulative MFFO Payout

Cumulative MFFO since inception exceeds the cumulative cash distributions to common shareholders, indicating the REIT has fully funded cash distributions from its real estate operations. At the current distribution rate and level of modified funds from operations, trends suggest the distributions can be maintained.

Summary

The REIT's return on assets for the last four quarters was 7.33%, well above the yield on 10-year Treasuries of 2.50%, and it had a positive leverage contribution due to its 3.30% average cost of debt and 51.9% debt ratio. A significant 21% of the REIT's debt matures within two years and 62% is at unhedged variable rates, indicating a potential refinancing need and substantial interest rate risk. Its interest coverage ratio for the last four quarters at 3.4X is above the 2.0X benchmark. Since inception the REIT has paid out only 52% of MFFO in cash distributions, excluding DRP, and this rate was 44% for the last four quarters, a very sustainable cash distribution payout rate.
